SUMMARY

Passionate about coding and problem-solving, I am seeking a software developer role where I can create impactful and user-focused solutions. After studying Architectural Engineering for two years, I shifted to software development, completing a bootcamp at Northcoders and continuously expanding my expertise through personal projects and learning new frameworks. My dedication to growth and delivering high-quality results makes me eager to tackle challenging development projects.

SKILLS

- **Languages:** JavaScript | Node.js
- **Frontend:** HTML | CSS | React | Next.js | Vue.js | Tailwind CSS | Sass | React Native
- **Testing:** Test-Driven Development (TDD) | Jest | Supertest
- **Other:** Git | Github | Agile and Scrum methodologies | Linux

WORK EXPERIENCE

Freelance Project Consultant   *September 2024 - October 2024*

Tech Returners | Remote

- Developed an exhibition curator platform as part of Tech Returners' Launchpad program
- Managed the entire development lifecycle, including design, coding, and testing, ensuring the MVP is met
- Enhanced technical and professional skills through real-world consultancy experience, preparing for industry challenges
- Gained proficiency in frameworks and tools to improve efficiency and scalability

Technologies: Next.js, React, Tailwind CSS, APIs

Junior Software Developer   *April 2024*

The Algorithm Avengers | Remote/Manchester

- Worked in an agile team of five developers, using standard Git workflow practices to develop a mobile application
- Facilitated team planning meetings, contributed to technical decision-making, and led whiteboarding sessions for ticket delegation
- Researched and implemented unfamiliar technologies to address blockers, enhancing the tech stack to achieve project goals
- Fostered a collaborative and inclusive team environment through clear communication to build a friendly and supportive environment where we all felt valued, which was reflected in our team retrospective

Technologies: React Native, Expo Go, Firebase

Junior Full-Stack Developer   *January 2024 – April 2024*

Northcoders | Remote/Manchester

- Completed a 13-week intensive software development bootcamp, solidifying skills in the fundamentals of JavaScript, Node.js and React
- Collaborated with person front-end, back-end, and full-stack projects, building applications, websites, and APIs from scratch
- Strengthened problem-solving skills by utilizing self-tuition and documentation to independently resolve challenges and learn new frameworks
- Practiced Test-Driven Development (TDD) daily and participated in pair programming to enhance code quality and collaboration
